

# Cintaya Long Cowl

DESIGNER: [Carol J. Sulcoski](#) SKILL LEVEL: [Intermediate](#)

Sock yarns with silk, tencel and bamboo not only have softness; they also drape beautifully. This long cowl can be worn as shown, with one long loop, or doubled up closer to the neck. Either way, you'll love the elegant lace pattern, shown off to perfection by the semi-solid hand-dyed yarn.

## Provisional Cast-Ons

A provisional cast-on is one that is originally created in waste yarn so that it can be undone at a later time, leaving live stitches for the knitter to work with. One method of working a provisional cast-on is to use a crochet hook to chain stitches. Using your waste yarn, chain a few more chains than the number of stitches you'll need to pick up. Cut the waste yarn and pull it through the loop on your hook. Using the working yarn, pick up one stitch through the bar that crosses the back of each chain until you have the desired number of stitches. Continue with the pattern as directed.

An alternative method is to simply cast on the required number of stitches with the waste yarn, knit a few rows in the waste yarn, then switch to the working yarn. You can then cut and remove the waste yarn, leaving a row of live loops in your working yarn.

No matter what method you choose, opt for a waste yarn in a smooth fiber like cotton. This will make the provisional cast-on easier to remove. You should also use a waste yarn that is similar in weight to the working yarn so that the live loops you get aren't significantly bigger or smaller than the rest of your knitting (i.e., if you are knitting the project in fingering-weight yarn, use a fingering-weight cotton yarn for the waste yarn).
