*If you've read my book, you know that you should feel free to use **any** materials you like to make the projects in it. Using different products than I do won't prevent your own projects from being successful and glamorous. However, you may wish to use exactly the same crystals I did. If so, you'll find it easier to locate them if you have the color and the Swarovski product number. I provide them here. All of these products are available online, on any number of websites. As of the time of printing the book, I purchase my crystals from www.perlesandco.com.*

— Annetta Valious
